EDUCATION

Bachelor of Technology (B.Tech), Information Technology

Bhagwan Parshuram Institute of Technology — Delhi, India

Sept 2023 – Present

Senior Secondary (Class XII), CBSE — 83.4%

St. John's Academy — India

Graduated: 2023

EXPERIENCE

Software Developer Intern

Seabird Logistics — Nov 2025 – Feb 2026

- Contributed to the development and testing of the **Gnosis Vendor Portal**, a logistics platform handling vendor onboarding and shipment workflows.
- Built and enhanced backend services using **Spring Boot** and **REST APIs**, improving system performance and scalability.
- Implemented UI improvements to streamline vendor interactions and reduce friction in key workflows.
- Identified, debugged, and resolved critical bugs, reducing system defects by **20%** and improving overall reliability.
- Optimized application performance, achieving a **45% increase in response speed** across core modules.
- Designed and executed test cases for modules including vendor onboarding, shipment tracking, order processing, and documentation.

Full Stack Developer Intern

Unified Mentor Pvt. Ltd. — Apr 2025 – Jul 2025

- Engineered a Cruise Ship Management system using **Spring Boot**, **React.js**, and **PostgreSQL**, serving over **200 users**.
- Created **5+ interactive modules** including movie ticketing and resort bookings with **95% uptime** during testing.
- Applied **role-based access control for 4 staff roles**, reducing processing errors by **30%**.
- Delivered **12+ REST APIs** handling real-time bookings and data operations with **<500ms average response time**.

PROJECTS

MARKIO (Frontend Developer) — Aug 2025 – Nov 2025

Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, OTP Authentication

- Designed and developed a **full-stack student attendance management system** using the **MERN stack**, serving **3 user roles (College, Teacher, Student)** on a unified platform.
 - Built a **unique code-based attendance mechanism**, eliminating proxy attendance and improving attendance accuracy by **~90%** compared to manual methods.
 - Developed **college, branch, and section management modules**, enabling structured handling of academic data and reducing administrative effort by **~60%**.
 - Implemented **timetable management functionality**, allowing colleges to create schedules that are automatically visible to teachers and students, reducing scheduling conflicts by **~50%**.
 - Designed and optimized **RESTful APIs** using **Node.js and Express.js**, ensuring scalable backend performance and secure data handling.
 - Modeled **complex relational data structures** using **MongoDB and Mongoose**, improving data retrieval efficiency by **~40%**.
-

AURIS AI (Backend Developer) — Mar 2025 – Apr 2025

Tech Stack: Spring Boot, Groq LLMs, RESTful APIs, JSession, PostgreSQL, Spring Data JPA

- Engineered an AI-driven web app capable of handling **text, image, and PDF-based interactions** via **Groq's multimodal LLM**.
- Built **secure RESTful APIs** for processing user-uploaded content and returning AI-generated insights.
- Established **session-based authentication** using JSession ID, enhancing request handling without exposing credentials.
- Constructed backend modules to parse and store **PDFs and images**, allowing contextual questioning over uploaded files.
- Utilized **Spring Data JPA** to manage user profiles, chat history, and media with proper relational mapping and persistence logic

SKILLS

Languages: Java, C++, C, JavaScript, HTML, CSS

Frontend: React.js, Material-UI, Axios

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate

Authentication: JWT, OAuth 2.0, JSession, Password Hashing

Databases: PostgreSQL, MySQL, H2

Tools: Postman, GitHub, Figma, Vite

Other: RESTful APIs, UI/UX Design, MVC Architecture

DevOps & Cloud: AWS, Azure, Docker, Kubernetes, Jenkins, Terraform, Ansible
